Summary

I am a web developer who specializes in creating the visible part of websites. I have experience in all aspects of building dynamic web projects, from start to finish. I'm skilled in various programming languages like HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, and Firebase, which are essential for creating interactive and attractive websites. I also have a strong background in managing projects and working with clients. Additionally, I have a good understanding of ArcMap and data analysis, which helps in examining and interpreting geographic information.
